DETAILED ACTION

Election/Restrictions

Applicant's election with traverse of claims 1-24 in the reply filed on 3 January 2006 is acknowledged. The traversal is on the ground(s) that that art that is pertinent to the device claims may very well also be pertinent to the method claims. This is not found persuasive because the method claims require further search, beyond the search for the device structure. In particular, method claim 25 is broader than device claim 1 in one sense, for example, because no electrometer is recited. Also, method claim 25 recites a limitation regarding the application of microwaves that is substantially different from any limitation regarding microwaves in the device claims. And, the different classifications show the need for separate searches. Note that Applicant can rejoin the method claims to any allowed device claim, by making the method claims dependent on the allowed device claim, for example. If Applicant believes that the scope of claim coverage of the two sets of claims is really the same, rejoinder is an option.

The requirement is still deemed proper and is therefore made FINAL.

Claims 1-24 are allowed.

This application is in condition for allowance except for the following formal matters:

Method claims 25-29 are non-elected with traverse. The claims should be canceled, or some other appropriate action should be taken.
